

3K optical module SC port

Overview

25G SFP (Small Form-factor Pluggable) module, BIDI (Bi-directional), operates at 1550nm wavelength and supports distances up to 3km using an SC port. This module is specifically designed for single-fiber communication, where both transmit and receive signals travel over a. A 1. Modules are compatible with all MikroTik products and with others marked as "Cisco. Help others learn more about this product by uploading a video! Would you like to tell us about a lower price?

Found a lower price?

Let us know. Although we can't match every price reported, we'll use your feedback to ensure that our prices remain competitive. With the SC SFP, users can connect to the corresponding LC SFP. Most SFP fiber optic modules use LC connectors, while SC connectors are mainly found in legacy networks and MPO/MTP connectors are used for high-density cabling rather than directly on standard SFP modules. This connector landscape reflects how modern SFP deployments prioritize port density and. Upgrade to 100G or 400G optics and save. Learn product details such as features and benefits, as well as hardware and software specifications.
