

Add material color to cable tray

Overview

You can go to Manage > Settings > Object Style > Set material for the cable tray category (NOTE: This setting will affect all cable trays) 2. The filter setting is the only option on Revit. if the cable tray has three. We can apply cable tray material in MANAGE>OBJECT STYLES> CABLE TRAY & CABLE TRAY FITTING (For all types). Considering this, how do you change the color of a component in Revit?

Furthermore, how do I add materials to a cable tray in Revit?

Add view filters for the different cable trays -> Add the. Electrical teams often rely on filters to colour tray and conduit in Revit which is driven by the Service Type parameter. Without materials applied directly to the elements, your exports stay grey. You can do this either. When trying to select a material for cable trays in Revit, the material parameter does not appear in the properties of the instance and type properties of cable trays: Currently in Revit, there is no material parameter in the cable tray type properties dialog. Every time you create a Conduit or a
