

Anti-cableway ground support

Overview

These components connect grounding wires to conduits, providing a safe path for fault currents and reducing electrical hazards. Our focus has always been on solutions from the field of cable support systems. We specialize in difficult ground. Eurotruss Ground Support tower systems are designed, engineered and developed to be built with standard versatile tower truss, but with a ladder brace on one side for safe climbing and with thicker tube walls for enhancing vertical load capacity in combination with a standard main rig Truss Type. Bolt and cable options. Our RubberForm Portable Electric Cable Support Towers or Cord Trees safely keep electric cables off the ground and away from human contact. The base is made of 100% American recycled rubber that won't. All Safety Climb Systems include Upper Cable Support Bracket, Plastic Cap, Cable Cushion, Cable Strand Vise, Cable Stand-offs, Lower Cable Support Bracket, Tension Rod, and 3/8" Extra High Strength.
