

CT Electrical Cable Trays

Overview

CT-E-type cable trays have integrated extension part and for jointing bolt sets RS 5 (bolt M6x12 and nut M6) or quick locks CT-QL (for trays H=60mm) can be used. Both create a sufficient electrical conductivity, which eliminates the need to install a separate grounding wire. EAE Cable Tray System product E-Line CT is being manufactured as a hot dipped product that is used in heavy or medium duty application with its perforated design. We have several vertical models. Discover our different solutions and don't hesitate to contact us if you have any questions. Do you have questions, special requests or want to discuss a complete solution that. Cable trays play an important role in ensuring the safety of electrical wiring, cables, etc. This zinc coating is easily deformed. A cathodic action occurs on cut surfaces (up to 1. First, the steel is. With over 130 years of combined electrical and mechanical support systems experience, the CT Innovations leadership team set out to build an agile company that's focused on and dedicated to customers, not shareholders.
