

Cambodia RoHS compliant optical core router 200G

Overview

They are compliant with the QSFP+ MSA and with IEEE 802. Digital diagnostics functions are available via the I2C interface as specified by CMIS4. Similarly, it optically de-multiplexes a 212. 5 Gbps input into 4-channel signals, and converts them to 4-channel output electrical. ulti mode fiber, hot pluggable optical transceiver. It can transmit up to 7 ome applicable to any particular order or contract. In accordance with the OPTONE policy of continuous i ent or other protective rights of. The Cisco® family of QSFP modules provide solutions for AI/ML data center applications, Network Interface Cards (NICs) on servers, and for data center switches, while leveraging the breakout capabilities and backward compatibility to lower-speed QSFP pluggable modules and cables. The Cisco 200GBASE. Broadex Technologies' high performance and cost effective 200G Optical Transceiver Modules are built utilizing our innovative COB technology in a QSFP56 form factor. Designed for use in next-generation datacenters, these reliable and robust modules support high speed bit rates up to 200Gb/s over. GND is the symbol for signal and supply (power) common for the QSFP56 module. All are common within the module and all module voltages are referenced to this potential unless otherwise noted. Supporting 2km transmission over single-mode fiber with CWDM wavelengths (1270/1290/1310/1330nm), this module delivers 4 dB link budget with PAM4 modulation at 53.
