

Disable the new switch port

Overview

Select Actions > Enable/Disable and in the drop-down list, select either Enable or Disable. A Success message is momentarily displayed. If you really want to permanently block a port, the cleanest option is to use an RJ45 port blocker/security cap. They're made for exactly this they snap into the port and can't be removed without a special key. 5, I have (not changed from defaults really): enable_vlan: 1 ar8xxx_mib_poll_interval: 0 ar8xxx_mib_type: 0 enable_mirror_rx: 0 enable_mirror_tx: 0 mirror_monitor_port: 0 mirror_source_port: 0 arl_table: address. To enable or disable selected switch ports: Select the Configuration > Ports > Ports page. In the Table view, scroll and select pages as needed and click on the port checkbox (es) to select ports to configure. SIGN IN New to NetApp?
