

Distribution box protection level IP

Overview

According to JGJ 242-2011 Residential Building Electrical Design Code 6. 5, it is stipulated that the protection level of outdoor power supply inlet box is not lower than IP54. The IEC has developed the ingress protection (IP) ratings, which grade the resistance of an enclosure against the intrusion of dust or liquids. Electric and electronic equipment deteriorate or malfunction when water or dust enters the device. Many people are unsure what these ratings mean or which option best meets their needs. This article explains the key points and clears up some confusion. Ingress Protection (IP) ratings measure how. The truth is, picking the right protection level for distribution boxes isn't just about compliance paperwork—it's about real-world reliability when it matters most. Sometimes called the International Protection rating, it is defined by the International Electrotechnical Commission (IEC) under the international standard EN 60529 (British. IP ratings classify the levels of protection against solid objects, dust, accidental contact, and water in electrical enclosures. What is IP Protection?

“ IP ” stands for “ ingress protection.
