

Electrical cable tray T-junction

Overview

This junction allows reliable and neat formation of a T-shaped branching of cable routes, ensuring stable and safe cable routing in different directions. Made of hot-dip galvanized steel, this junction features very high resistance to corrosion, mechanical loads, and environmental. Fitting for the construction of T-joints or crossovers of Metatray® insulating trays for the conduction of electrical and telecommunication cables. Made of PVC-based thermoplastic insulating material. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned in this technical guide only apply to our own cable management ranges and cannot under any circumstances be transposed to the enclosure. Here you will find the list of your Material Lists. Material: Made from high-quality galvanized steel or stainless steel for durability.
