

Energy-saving OPGW fittings for power systems

Overview

OPGW fittings play a pivotal role in ensuring seamless data transmission alongside electrical power. Splices, connectors, dead-ends, suspension clamps, vibration dampers, downleads, and fibre optic pigtails collectively contribute to the reliability and efficiency of these. e transferred to the core or optical elements within. The combination of retaining rods, wedge and housing distribute axial and compressive loading over a large area of the OPGW cable. We offer a full range of AB Cable (Aerial Bundled Cable) accessories and fittings which conform to NFC and IEC standards. Now before. ficing corrosion resistance. It is best suited to applications with moderate to low span ut increasing fibre strain. Depending on design, OPGW (optical ground wire) ly designed for the spe-cial requirements of fiber optic overhead cables.
