

European International Optical Cable Construction

Overview

The Medusa project will install 7100 km state-of-the-art submarine optical fibre cable in the Mediterranean and connect Northern African countries with Cyprus, France, Italy, Portugal, and Spain with the aim of increasing by 200 times the speed of internet in Northern Africa. The Medusa project will install 7100 km state-of-the-art submarine optical fibre cable in the Mediterranean and connect Northern African countries with Cyprus, France, Italy, Portugal, and Spain with the aim of increasing by 200 times the speed of internet in Northern Africa. The Medusa project will install 7100 km state-of-the-art submarine optical fibre cable in the Mediterranean and connect Northern African countries with Cyprus, France, Italy, Portugal, and Spain with the aim of increasing by 200 times the speed of internet in Northern Africa universities. This. The project company, IOEMA Fibre Ltd. IOEMA is a state-of-the-art, high-capacity, 1600 km repeatered submarine fibre optic project that will arc across five key northern European markets – the UK, The Netherlands, Germany, Denmark and. High-quality, energy efficient optical fibre telecommunication networks will be the backbone infrastructure to enable the digitalisation our lives, working environments, services and operations. Whatever forms the digitalisation will take and whatever technologies it may be using, a strong, robust. As part of the project, a comprehensive fiber optic network construction project was implemented in three phases. Approximately 140 kilometers of excavation work was carried out in various types of urban environments, including challenging conditions. We are building on our development and can now. particular in West and Central Africa, as well as Eastern Africa.
