

European regulations for the installation of electrical distribution boxes

Overview

The IEC (International Electrotechnical Commission) and BS 7671 (British Standard for Electrical Installations) both provide essential requirements for electrical installations, including those for fuse boards like garage unit, consumer unit and distribution board. While the IEC 60364 standard. Working on an international project electrical engineers are often bewildered by the extensive amount of electrical standards and wiring regulations which determines their decisions. of each set of installation levels. Obviously, on people makes it possible engineer's. Here, you can find how this is done in practice, what rules exist and what manufacturers and importers need to take into consideration. On 20 April 2016, a new version of the 1st Ordinance on the Product Safety Act (Regulation on Electrical Equipment - 1st ProdSV) came into effect. It is essential to take into account these local constraints before starting the design.
