

Fiber optic transceivers Ethernet switches

Overview

Fiber optic transceivers are widely used in wired networking applications such as Ethernet, Fibre Channel, SONET/SDH/ONT, CPRI, FTTx, and InfiniBand. VERSITRON manufactures a wide range of fiber optic switches that provide links for your 10Base, 100Base, 1000Base Gigabit, and 10 Gigabit networks simultaneously. Various port sizes are available ranging from 4 up to 52 ports. OmniConverter Compact Ethernet Switches feature one or two uplink ports and up to eight 10/100/1000 RJ-45 ports, and are. These Ethernet switches are meticulously crafted for industrial applications, offering a robust housing, compact design, and specifications tailored to withstand the rigors of industrial environments. Their durability is further emphasized by a wide temperature range and an extended input voltage. Optical transceivers are crucial components for network switches, enabling them to connect to fiber optic networks and transfer data at high speeds. Test transceivers' eye diagram situation, receiving sensitivity, extinction ratio, etc. Ensure the signal stability, and reliability of the transmission. □Plug and Play□: Plug and play.
