

Functional Funnel Bridge

Overview

The Bridge Funnel Technique is a funnel-building strategy that connects a specific problem your audience is experiencing to a product that directly solves it — using a simple, value-first lead magnet or piece of content as the bridge. It's like. While several tools can create bridge funnels, we'll demonstrate how to do so using FunnelKit's Funnel Builder, which integrates natively with WordPress and WooCommerce. The principles apply regardless of your chosen platform. The Funnel Builder by FunnelKit is the most powerful sales funnel. Commonly called a pre-lander, presell page or gateway page, the purpose of a bridge page is to qualify leads and “warm them up” to an offer. They are typically what you see on websites with a shopping cart, where the user clicks through from one. Bridge Funnel is a marketing tool designed to help businesses generate leads and build relationships with potential customers through automated email sequences. Bridge Funnel works by creating “bridge pages” – opt-in forms where people can enter their contact information in exchange for something.
