

H3C Monitoring Aggregation Switch

Overview

H3C S6530X series switches provide industry-leading high performance and scalable aggregation switching solution with modular dual power, fixed uplinks (40GE/100GE) and IRF for resiliency. The series offers OSPF/BGP and multicast, SDN enabled and flexible management. Link aggregation has the following benefits:

- Increased bandwidth beyond the limits of any single link. In an aggregate link, traffic is distributed across the member ports.
- Monitor your HPE H3C switches using SNMP.

This data is seamlessly integrated into Dynatrace's Infrastructure & Operations app, offering Network and Ops Administrators quick, actionable. Operation Manual - Link Aggregation H3C S7500 Series Ethernet Switches Table of Contents Table of Contents Chapter 1 Link Aggregation Configuration. 1 Introduction to Link Aggregation. 2 Introduction to LACP. If you're building a 2026-ready aggregation layer-either for a campus fabric (distribution/core) or a data-center edge pod-the H3C S6530X-48Y8C is designed for the mainstream upgrade path: 25G downlinks + 100G uplinks, with resiliency options (IRF2 / M-LAG) and modern ops visibility (Telemetry via. OpManager monitors H3C Switch for health and performance.
