

HTB-1100 Multimode Fiber Optic Transceiver

Overview

HTB -1100 is 10/100M adaptive fast Ethernet optical transceiver. Special made chip with low consumption, supporting over longtime frame. Description netLINK Series Fiber Media Converter is the conversion equipment of Ethernet optical-electronic signals between 10/100M UTP interface (TX) and 100M Fiber interface (F X). It can achieve two different twisted-pair cable and optical fiber transmission medium of transformation, relay base - TX 10/100 and 100 base - FX two different network segments, can satisfy the long distance, high speed and high. netlink HTB-1100 10/100/1000Mbps Multi-Mode Duplex Optic Fiber Transceiver offers 2KM fiber Ethernet media conversion for CCTV FTTH. Superior Photoelectric integrated module. 10/100 / 1000M auto-adaptive Ethernet fiber optical transceiver, using the latest design, high-performance chips, high-quality optical transceiver module, stable function and excellent quality, adaptability, and common network equipment can normally connection.
