

High-voltage power in the distribution box

Overview

High-voltage distribution boxes are super important in today's electrical setups. Think of them as the main hubs that make sure electricity gets to where it's needed, efficiently. Inside these boxes, you've got some key parts like circuit breakers, transformers, and protective. What is a high voltage box?

The High Voltage Power Box combines the functionality of an Onboard Charger (OBC), a DC/DC converter and a PDU (Power Distribution Unit). It converts the energy from the network grid AC (Alternative Current). Discover our HV PDU solutions – the powerful high-voltage power distribution units from 60 VDC to 1000 VDC for mobile machines and commercial vehicles. Eaton's high-voltage power distribution units (PDUs) and power distribution elements (PDEs) deliver power to all critical loads within the electric vehicle (EV) system -- including traction and auxiliary loads -- while protecting electrical and electronic components and vehicle occupants with. To support these demands, HUBER+SUHNER delivers innovative modular distribution boxes engineered to adapt to the changing requirements of modern vehicle architectures. HUBER+SUHNER's modular High Voltage Distribution Unit (mHVDU 800) can be tailored to customer specifications with a short lead. Our high voltage wire processing solutions give you the power needed to terminate high voltage connectors in a flexible, affordable and compact bench-top solution. Our KISSLING power relays and disconnect switches are engineered for high power, high voltage, and control switching applications.
