

Ladder-type cable tray integrated molding machine

Overview

The Cable Tray Ladder Roll Forming Machine integrates multiple technologies such as punching (including connecting holes and 7 buckle holes), forming, and cutting into one production equipment. A cable tray system used to support insulated electrical cables used for power distribution control and communication as an alternative to open wiring or electrical conduit systems. It utilizes cold bending technology to transform coiled metal sheets (such as galvanized steel, stainless steel, and aluminum alloy) into. Cable tray making machine is a fully automatic, high-efficiency production line designed for the continuous manufacturing of various types of cable trays, including ladder-type cable tray, perforated cable tray, and solid-bottom cable tray. It offers high-speed operation, precise shaping, and flexible customization to suit different tray sizes and materials.
