

Long-distance cable trays

Overview

Long-span cable trays are robust cable support systems for the safe routing of large cable bundles over longer distances. Calculation modules on-line for simulation of the load, cable filling or other parameters of cable route size to facilitate selection of the most appropriate products. Overview of main solutions with complete groups and families of products for implementation of any required cable trunking and. us-trations without notice. All illustrations, descriptions and technical information included in this document are provided as indications and can cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. Cable tray (or cable ladder) systems are a popular alternative to electrical conduit systems, as they have an outstanding record for dependable service, design flexibility and cost savings in commercial and industrial applications.
