

Mine power distribution box

Overview

Voltage fluctuations are frequent when working underground. This fluctuation may lead to equipment failure and, even worst, short-circuiting-induced fires. A suitable power system is necessary to protect your valuable workers and expensive equipment. Voltage fluctuations are frequent when working underground. This fluctuation may lead to equipment failure and, even worst, short-circuiting-induced fires. A suitable power system is necessary to protect your valuable workers and expensive equipment. A power system transforms high voltage to low voltage, providing ultimate protection. Becker SMC USA provides a top-quality, durable custom-built power system to resonate with your mining strategy. These custom-designed power centers are built to fight any harsh environment and weather. You can choose the voltage combination or frequency that suits your electrical requirement and build your power system in various shapes and sizes to. Different countries might have additional equipment protocols for their mining industry. Therefore, we design mining equipment to meet general requirements. No matter where you are, you can count on us for top-quality mining equipment that meets your country's standard equipment protocols. We deliver to your doorstep. So, please choose what you need.
