

NEMA4X Head Unit for Petroleum and Petrochemical Use

Overview

It is designed for installation in general and hazardous locations, meets NEMA 4X/IP66 ratings and is resistant to ultraviolet rays and corrosive chemicals. Its high-impact materials protect instruments installed in harsh field conditions. Oxidation, hazardous chemicals, complex installation, and durability are some of the many elements that must be addressed when selecting a solution for. AZE has solutions in the Petrochemical Electrical Enclosure field. The equipment shall operate under two input voltage, 120VAC or 347VAC. The equipment frame shall be of industrial grade polyvinyl chloride with a gasket around lenses and canopy designed specifically for hostile. Petrochemical electrical enclosures must endure harsh environments that would overwhelm a standard product while competing in price and availability with the off-the-shelf alternative for NEMA enclosures. Bison ProFab built its business in the heart of the Texas oil patch, which means we know how. Adalet's JN4XSS series wall-mounted JIC enclosures are designed to provide protection, indoors and outdoors, against dust, dirt, oil and water for items such as pneumatic or hydraulic instruments, transformers, and junction wiring. These enclosures are suitable for use in areas such as petrochemical. The LH1 connection head with two entry ports is ideal for use with head-mount transmitters and terminal blocks used for sensor wire terminations.
