

RF Optical Module Solution

Overview

RF-over-fiber modules transport RF signals over optical links to reduce coax loss and extend distance, using linearized transmit/receive optical chains. They are specified by RF bandwidth, dynamic range, connectorization, and optical power. Innovative solutions for EW u2028& radar systems for radar range calibration and Phase Matched & Remote Antenna EW apps. RFOptic is a worldwide leading innovative company with global coverage. Top-notch RF-Over-Glass commercial off-the-shelf products for civil 5G and Defense applications. These high-performance RFoF products are trusted by major satellite operators and broadcasters worldwide for reliable and scalable Radio over Fiber. Our FiberLink plus systems offer a wide range of RF-over-Fiber solutions for converting electrical RF to optical signals and transmission via optical fiber. The FiberLink plus series incorporates standard (non-redundant), N+1/N+2 and 1:1 redundant solutions suited for indoor and outdoor.
