

Secondary Distribution Box 601

Overview

ABB Relion REF601 is an entry-level feeder protection and control relay for secondary distribution. ABB's Control Room offering includes a comprehensive range of solutions designed to optimize the operator workspace for critical 24/7 processes across various industries. The control room is considered one of the most critical areas in any facility, impacting daily decision-making and overall. REF601/REJ601 is a member of ABB's Relion ® Further, the configuration functionality of the product family and part of its 605 series. 112, Normal Inverse (NI), REF601/REJ601 offers three-stage overcurrent Very Inverse (VI), Extremely Inverse. Primary distribution systems consist of feeders that deliver power from distribution substations to distribution transformers. The SDB can be fitted with terminal blocks for custom. ACS takes the basic idea of zone wiring and combines it with pre-cut, pre-tested cable and plug-in connectors, to provide power and telecommunication systems that can be installed under raised floors (The Intelligent Floor), or in accessible ceilings (The Intelligent Ceiling).
