

Smart Solution for Swisscom Site Power Supply Systems

Overview

The new, future-proof Energy & Enclosure platform is a fully integrated site-energy solution that combines high-efficiency power systems, intelligent energy storage, advanced enclosures, and the Controller 6610 to deliver more resilient, secure, and sustainable networks. The platform features a fully digitized energy system with AI-driven capabilities to enhance energy efficiency, operational performance, and. For utility companies, smart metering offers data-based analysis, management and efficient operation of your systems. Swisscom supports you with proven, standardised solutions for IoT connectivity and IoT management, with an IoT platform and a comprehensive smart meter ecosystem and strategy. Ericsson and Swisscom have launched a next-generation intelligent power platform to transform energy management in mobile networks, as part of a push toward more sustainable and resilient telecom infrastructure. This is a great example of how the Lithium Battery Technology is transforming energy management in telecom.
