

Specifications for protective rubber strips in distribution boxes

Overview

FEATURES unbreakable, halogen-free and aging-resistant solid rubber housing resistant to a diversity of oils, greases, gasoline and acids high mechanical strength, aging and corrosion resistant UV and ozone resistant insensitive to fountains of welding sparks and similar. FEATURES unbreakable, halogen-free and aging-resistant solid rubber housing resistant to a diversity of oils, greases, gasoline and acids high mechanical strength, aging and corrosion resistant UV and ozone resistant insensitive to fountains of welding sparks and similar. pc E Solid rubber distribution boxes — mobile — Information SOLID RUBBER HOUSINGS Our solid rubber distributor housings are made from a mixture of natural rubber, styrene and butadiene (NW SBR). The raw material is processed — in slab form — at pressures of up to 400 t and at a temperature of. Rubber blocks for distribution boxes are rubber products specially designed for the internal and external related parts of distribution boxes, playing a key role in the normal operation and safety protection of distribution boxes. Ethylene propylene diene monomer (EPDM): It has excellent weather. There are four different models, with a high or low frame, with or without junction box. Their robust characteristics makes them suited for application in harsh conditions: curious what's inside the box?

The overhanging lid combined with the tapered housing provides water draining. Together with. rubber housing is produced using a press and vulcanization process. These advantages. Substation Rubber Strips for Electrical Safety, Cuttable Insulating Floor Matting for Distribution Room Factory Workshop, Dielectric Worker Electric Shock Protection Mat (10x100x0.8cm) Brief content visible, double tap to read full content.
