

Telecom-grade fiber optic flange coupler

Overview

As a key component of optical fiber connection, this carrier-grade sc simplex optical fiber flange coupler is manufactured using high-quality materials to ensure efficient and stable signal transmission. Its low loss characteristics mean that there is virtually no loss in data. Fiber optic couplers are indispensable for stable and high-performance fiber optic transmission., are widely used in the optical industry. Fiber optic's advantages over copper cabling are well known immunity to EMI and RFI, low attenuation over long distances, high bandwidth capacity, smaller size and lower weight. Fiber optic cable is also difficult to tap and intercept. A fiber optic adapter — also known as a coupling or mating sleeve — is the passive device that aligns two connectors inside a patch panel, wall plate, or distribution box. Multiple connector options available.
