

Which line does the router s fiber optic cable belong to

Overview

Cabling, including fiber optics, is covered in the Layer 1, the PHY or physical layer. For a complete description, all seven layers consist of: Layer 1 - Physical Layer (the PHY) The “straight line” distance between the point of entry of the cable (very close to the existing point of entry for the copper wire) and my preferred ONT location is approx 2metres, although the cable route will require approx 8 metres of cable (skirting board run and doorway). Is. These are networking standards that separate networking protocols into seven layers. This specialized equipment serves as the. Fiber technology is a direct connection to your home: Internet data travels as light through a glass fiber optic cable to a device called an Optical Network Terminal (ONT), which converts the signal for your router. This direct, uninterrupted path is what makes fiber incredibly fast and reliable.
