Why is the fiber optic indicator light on the router not on

Overview

Ensure your Fiber Jack is connected to the network and the LED lights are connected and working properly before moving on to troubleshoot your router. When it's green and steady, everything is fine. However, when it blinks red or stays solid red, it signifies a Loss of Signal, a problem preventing your router from communicating. If your router's lights suddenly go out, don't panic—this common issue can often be fixed quickly with a few simple steps. In most cases, restarting the router, checking the power source, and. Before I tell you a simple trick to switch on the internet light and restore your internet connection, let us know about the different LED lights on the modem-cum-router. Depending on the brand and model of the router, the color. The LEDs on your modem, optical network terminal (ONT), router, or modem/router combo (gateway) are most likely blinking because they're communicating what the device is doing, or there's an error. POWER Normal: Solid/stagnant light. If OFF: The router is not powered — check the socket, adapter, or power cable. A red light or light (or if the light.
