

Will there be enough AI servers in the future

Overview

The AI server market is set for unprecedented growth in 2023-2024, driven by substantial investments from CSP and industry players, with shipments projected to exceed 1. She leads Deloitte's global digital transformation research and focuses on topics including digital strategy, cloud, AI, cyber, blockchain, Internet of Things, experiential technologies, and the future of the workforce. This surge highlights the expanding role of AI in transforming the compute infrastructure, and the difference between accelerated and non-accelerated. Dell, HPE, Lenovo, and Supermicro are riding record AI server demand, but winning enterprise customers requires more than just Nvidia chips. Image:. AI servers and Graphics Processing Units (GPUs) are at the heart of this revolution, driving the performance and efficiency of AI applications. 74 USD Billion by 2035, exhibiting a compound annual growth rate (CAGR) of 34. 46% during the forecast period. As part of CRN's AI Week 2024, check out a sampling of AI servers from a number of server vendors and system builders. However, the release on November 30.
